ABOUT US

What We DO

Northfields offers process industries a set of integrated skills and services designed to lower the procurement costs for foreign MRO goods while maintaining the highest standards of supply. Daily demand for MRO supplies at plants fluctuates, with stock rooms orders, requisite emergency parts, high-use components, scheduled maintenance projects and spot purchases of rarely used items.

NorthFields's services manage the flow from submitted orders to deliveries. Where appropriate, goods from all suppliers are gathered at our depot and prepared for export or import.

NorthFields's custom-built ERP system enables an efficient flow of goods and transactions using state-of-the-art IT to link its servers with the networks of suppliers, logistics vendors and clients.
